Re: Temporary Variance Request  
Waste Acceptance Quality Assurance/Quality Control Plan  
Jefferson Parish Sanitary Landfill  
Avondale, Louisiana

Dear Mr. Mollere:

Waste Management of Louisiana, LLC is providing this request for a temporary variance from the facility Waste Acceptance Quality Assurance/Quality Control procedures. The variance is requested specifically to continue to accept asbestos-containing waste materials from the Westbank Remediation Site Project which is currently underway between USEPA and IT Corporation.

The variance is requested due to the relocation of solid waste materials at the facility to the newly constructed cell. The variance will require the placement of the asbestos-containing waste materials to be placed directly within the working face since there is not sufficient volume of waste placed in the new cell to provide burial of the material at this time. The duration of the variance will be dependent upon obtaining sufficient volume in the near future to provide for the burial of the materials. This variance will provide uninterrupted disposal service for the specific project. Your consideration of this request is appreciated. If you have any questions or require clarification, please call me at 504/436-0152.

Sincerely,

Amanda Sullivan  
Site Engineer
